

Welch Allyn Introduces FlexiPort™ Blood Pressure Cuffs

True standardisation in a snap.

Introducing the first and only blood pressure cuffs designed to simplify life for both you and your customers. By standardising on Welch Allyn FlexiPort blood pressure cuffs, your customers have the ability for the first time to use one cuff on virtually all electronic and manual blood pressure devices, regardless of tubing or connector configuration. And by eliminating different tube and connector configurations, distributors like you will experience reduced inventory levels, simplified ordering, and up to 60 percent fewer part numbers.

The FlexiPort connection gives caregivers the ability to attach and detach blood pressure tubes directly to the cuff – giving caregivers the versatility to use one cuff on virtually all devices.

FlexiPort™ blood pressure cuffs offer practical benefits for both you and your customers

For you:

- Up to 60 percent fewer, easier-to-understand part numbers
- Reduced inventory levels
- Simplified ordering process

For your customers:

- Ability to use one cuff style on virtually any blood pressure device
- Fast, simple one-hand attachment/detachment from port makes changing cuffs faster and more efficient
- Colour-coded for easy visual size identification of cuffs
- Reduced inventory and cost

Model Number Conversion

Most existing Welch Allyn Disposable and Durable blood pressure cuffs will be replaced by the new FlexiPort Disposable and Reusable cuffs. Convert your part numbers today!

New part numbers go into effect January 2, 2008!
